

Integrated Receivables Cloud Platform

Integrated Receivables Cloud is a solution to optimize A/R operations by integrating all receivables and payment modules to work as a unified business process. At the core of the Integrated Receivables platform are solutions for credit, collections, deductions, cash application, electronic billing and payment processing – covering the entire gamut from credit-to-cash. It leverages Rivana™ Artificial Intelligence for Accounts Receivable to convert receivables faster and more effectively using machine learning for accurate decision making across credit and receivable processes. The Integrated Receivables platform also enables suppliers to digitally connect with buyers via the RadiusOne™ network, closing the loop from the supplier A/R process to the buyer A/P process via RadiusOne™.

Integrated Receivables Cloud provides the following comprehensive solutions for managing and optimizing the credit-to-cash cycle:

Credit Cloud replaces a paper intensive credit management process with an electronic one to enable better credit portfolio and risk management and to quickly onboard new customers.

Electronic Invoice Presentment and Payment (EIPP) Cloud provides tools that automate and speed up invoice communication and facilitate a faster collection of payments, enabling a closer and more convenient relationship with customers.

Cash Application Cloud is the most comprehensive solution available for automating cash application across all payment and remittance formats – EDI, email, paper, and portals. Driven by customer-specific business rules, automated on-invoice hit rates of 98%+ are typical with the solution.

Deductions Cloud enables a proactive deduction management operation which streamlines processing, shortens resolution cycle time, reduces processing costs, and increases recovery rates on invalid deductions.

Collections Cloud automates and optimizes the collections process to improve collector efficiency, minimize bad debt write-offs, improve customer relationships and reduce DSO.

Rivana™ is the Artificial Intelligence platform for high-impact decision making across HighRadius cloud solutions for credit, collections, deductions, cash application, billing and payments using Credit and A/R Data.

radiusOne™ is the only supplier driven A/R and A/P platform which helps A/R teams to digitally integrate their receivables operations with their buyers' A/P processes over a single network.

Solutions for Credit-to-Cash

Benefits

- Reduce Days Sales Outstanding (DSO) by 10%.
- Achieve a 98%+ cash application on-invoice hit rate while freeing up 80% or more of your analyst’s time.
- Limit upfront capital expenditure and minimize the need for internal IT involvement by using a “pay-as-you-use” SaaS solution with a monthly subscription fee.
- Cloud flexibility via multiple editions (basic, professional, enterprise and unlimited) to scale to your needs of price and functionality.

About HighRadius Corporation

HighRadius is a Fintech enterprise Software-as-a-Service (SaaS) company. The HighRadius™ Integrated Receivables platform optimizes cash flow through automation of receivables and payments processes across credit, collections, cash application, deductions, electronic billing and payment processing. Powered by the Rivana™ Artificial Intelligence Engine, HighRadius™ Integrated Receivables enables teams to leverage machine learning for accurate decision making and future outcomes. The RadiusOne™ B2B payment network allows suppliers to digitally connect with buyers, closing the loop from supplier receivable processes to buyer payable processes. HighRadius solutions have a proven track record of optimizing cash flow, reducing days sales outstanding (DSO) and bad debt, and increasing operational efficiency so that companies may achieve strong ROI in just a few months.
